

SSI Gateway Phase 2 Construction

- On Sunday, July 5th beginning at 6:00 a.m. construction of Phase 2 of the Gateway project will begin.
- Traffic will enter the island via Kings Way. Kings Way will be a two-lane, one way road.
- Sea Island will be one way (north) from Kings Way to Demere Road. This portion of Sea Island Road will be one lane.
- Demere Road (west from intersection with Sea Island Road) will be one way exiting the island. Motorists turning right from Sea Island Road onto Demere Road (west) will not have access to the existing bypass lane. Barricades will be placed along the shoulder from the intersection to the causeway to allow crews to conduct shoulder work along Demere Road.
- The traffic signal timing at the intersection of Sea Island Road and Demere Road will be adjusted for the new flow of traffic. The signal movements will be reduced from 8 to 4 for this phase of construction.
- The Kings Way Loop will not be open initially. Traffic will use a temporary road to access Kings Way.
- The Sea Island Loop will be open for traffic to access Sea Island Road.
- Phase 2 will last approximately 72 days. At the end of Phase 2, Demere Loop and a turn lane at the intersection will be completed.
